SKU: OLD024004 OLD024005

Categories: [Industry pumps](#), [Pneumatic piston airless pumps](#), [Outdated pumps](#)

DESCRIZIONE DEL PRODOTTO

The 2900 BARREL pneumatic transfer pumps is designed with Taiver's more than 35 years of experience in the industry. Ideal for pumping and decanting self-levelling products, inks, oils even dense ones, in cataphoresis baths in paint distribution plants, intumescent in mechanical industries and in any other case with viscosity products up to 100,000 centipoise.

PERFORMANCES

- Available in two versions:
 - * For 200 ltr drums
 - * For 60-ltr drums
- Tungsten carbide valves
- Stainless steel pumping part to ensure the highest quality.
- Ideal for ink decanting
- Especially suitable for products
- intumescent in mechanical industries

CONSTRUCTION SPECIFICATIONS

2900 BARREL has state-of-the-art technology covered by two patents: rapid volumetric air motor reversal, which allows a very small pressure drop upon reversal, and the simultaneous gasket pack adjustment system. Simultaneous adjustment of the packs in relation to wear and tear allows a longer service life and, above all, better utilization of the device's performance. The produced piston has a hard chrome treatment and all parts in contact with the product made of stainless steel. Maintenance is easy and simple. The valves are made of tungsten carbide.

APPLICATIONS' FIELD

- Automotive industry
- Mechanical Industry
- Bodyworks

APPLICATIONS

- Rustproofing
- Oils
- Fats
