Email: info@witsrl.com

SKU: N/A
Categories: Building Pumps, Electric airless diaphragm pumps

Dati Tecnici:

Volt: 230 Volt / 50 Hz **Power:** 1HP **Max. Scope:** 4,5 ltr/min **Max. Flow rate with nozzle:** 2.5 ltr/min **Max nozzle size:** 1 Gun 0,021 – 2 Gun 0,013 **Pressure max (bar):** 220 **Length tubo max. mt:** 60 **Elevation tubo max. mt:** 60 **Weight kg**: 28 **Max. suggested viscosity(Centipoise):** 160

DESCRIZIONE DEL PRODOTTO

GOLD series airless paint units are suitable for both solvent-based and water-based paint spraying. They are supplied as standard mounted on a trolley with material pressure regulators and pressure gauges and complete with a paint suction system from the can/can. Alternatively, versions with gravity tanks and their adapters are also available. W.I.T. manufactures and supplies airless hoses, guns and nozzles to complete the painting kit. Designed for the needs of small industries and the craftsman:7GOLD 4200NEW is a diaphragm-based airless divernicizing device recommended for small and medium jobs in construction, applying lacquers, paints, furniture polishing, carpentry and craft workshops.

Construction features: The electric motor of the : 7GOLD 4200 NEW is in class H, that is: the highest quality and safety. It can work even under severe inconditions and high ambient temperatures. An automatic system stops the pump when exceeding the electric safety limits. The pump heads are made of aluminum treated with hard nickel, and the valves are made of tungsten carbide. :7GOLD 4200 NEW is designed for easy and simplified maintenance. The airless system allows a greater pulverization speed and a significant reduction in overspray, consequently a reduction in paint and solvent consumption. A decrease in overspray reduces pollution with benefits to the operator and the environment!
