SKU: IMPA
Categories: Building Pumps, Plastering

DESCRIZIONE DEL PRODOTTO

Description
The WIT mixer machine is ideal for preparing various types of material such as: glues, tile glues, thermal insulation glue, mortars, plasters, powder finishes, plasters with synthetic material, silicate or silicone bases.

In just a few seconds it mixes the product, guaranteeing a high aeration level and excellent volumetric efficiency. It can be used in combination with plastering machines and transport pumps, therefore making up an independent mixing and pumping unit. Great care has been taken in ensuring extremely easy handling and maximum operator safety; the machine can be quickly disassembled into three parts and easily transported. The WIT mixer machine has been constructed in strict compliance with all relevant safety standards and provided with an operation and maintenance manual as well as a CE conformity certification.

Technical data
Volts 230 V
Power 1,8 kW
Capacity 80 l

Size
Loading height 1000mm
Width 600mm
Length 1600mm

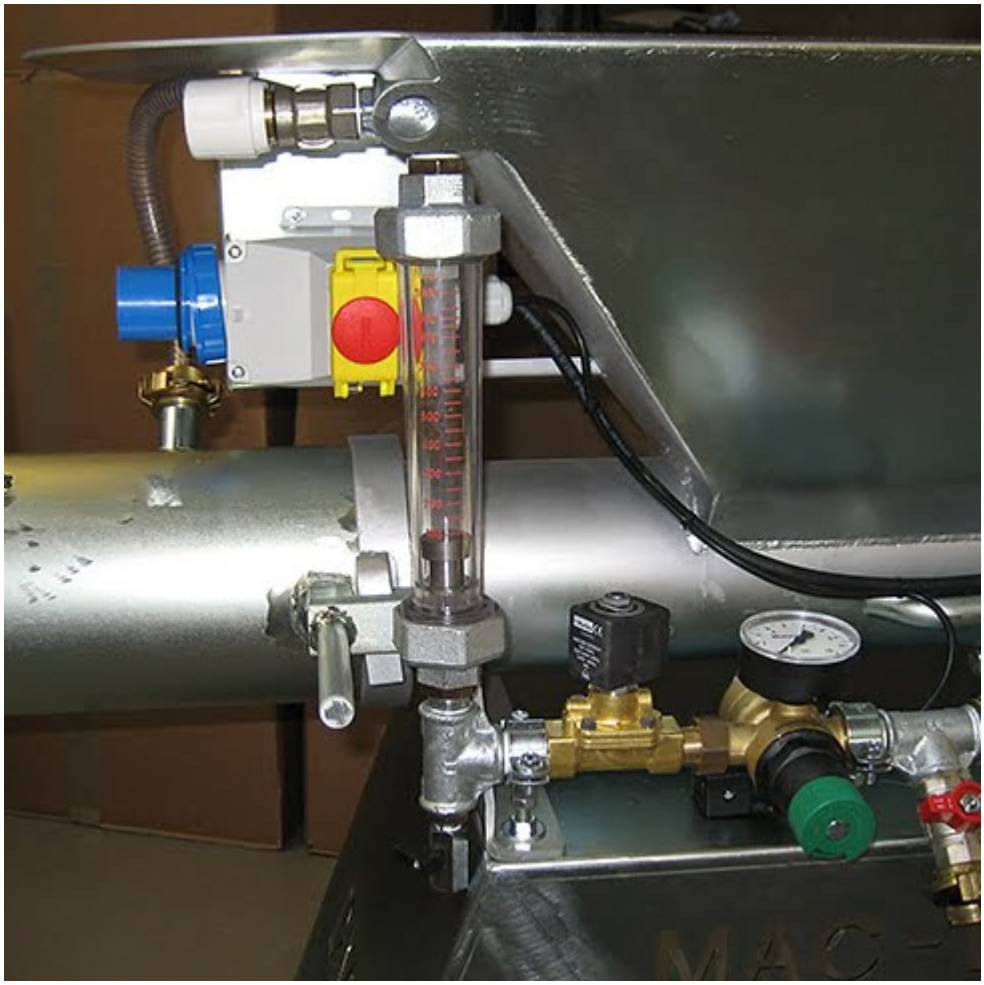

Standard equipment
1,8 kW Gearmotor
230V Overloard cutout-control
Water unit

Optional

Pompa acqua e flussimetro

particolare pompa acqua e flussimetro

impastatura

mescolatura
