DESCRIZIONE DEL PRODOTTO

W.I.T. automatic guns are suitable for all types of medium to large industries, ideal for automatic recirculation and robot installations.

- Fluid passage body made in AISI 304
- Diffuser, needle and pin made in AISI 303
- Ball and seat made in T.C.

W.I.T. automatic guns have particularly small dimensions and a compact and extremely robust body. Easy to place, reliable and versatile, they have a high needle opening/closing speed, which definitively reduces overspray, resulting in saving paint and avoid dirt in the work place.

W.I.T. automatic guns can be installed in series with great ease thanks to their support holes.

W.I.T. automatic guns are available in the following versions:

- Automatic airless guns
- Automatic air-mix guns
- Automatic air guns
